

LEVEL - 01

NAME: DHARSHAN A N

REG NO: 192525370

COURSE CODE: CSA0904

COURSE NAME: PROGRAMMING FOR JAVA

The screenshot shows the SIMATS Online Programming Lab interface. At the top, it says "SIMATS ENGINEERING" and "SIMATS Online Programming Lab" with a "Secure Exit" button. The user's name "Dharshan A N" and registration number "192525370" are displayed. The interface is for "Level 1" and "Java" programming. On the left, there is a "QUESTIONS" sidebar with "LEVEL 1 - EASY" questions: Q1 Numbers, Q2 Loops, Q3 Strings, and Q4 Array. The main area shows question (E) "Perfect Number" with the instruction "Write a program to print the given number is Perfect number or not?". It provides sample input (6) and output ("It's a Perfect Number"). Below the question, there is a "Your Code" editor with a Java program that checks if a number is perfect. The "Program Input (stdin)" field contains the number 17. The "Output" field shows "It is not a perfect number".

QUESTIONS
LEVEL 1 - EASY
Q1 Numbers
Q2 Loops
Q3 Strings
Q4 Array
0 / 4 submitted

Level 1 - Easy (E) Perfect Number — Numbers
Write a program to print the given number is Perfect number or not?
Sample Input:
Given Number: 6
Sample Output:
It's a Perfect Number
1. 17
2. 261
3. 143
4. 84.1
5. -963

Your Code

```
1 import java.util.*;  
2  
3 public class main {  
4     public static void main(String[] args) {  
5         Scanner s = new Scanner(System.in);  
6         int num = s.nextInt();  
7         int sum = 0;  
8         for (int i = 1; i <= num / 2; i++) {  
9             if (num % i == 0) {  
10                 sum += i;  
11             }  
12         }  
13     }  
14 }
```

Program Input (stdin)
17

Output
It is not a perfect number

The user's name "Dharshan A N" and registration number "192525370" are displayed. The interface is for "Level 1" and "Java" programming. On the left, there is a "QUESTIONS" sidebar with "LEVEL 1 - EASY" questions: Q1 Numbers, Q2 Loops, Q3 Strings, and Q4 Array. The main area shows question (E) "Inverted pyramid" with the instruction "Write a program to print inverted pyramid pattern.". Below the question, there is a "Your Code" editor with a Java program that prints an inverted pyramid pattern. The "Program Input (stdin)" field contains the number 5. The "Output" field shows the pattern of asterisks. At the bottom right, there are "Run" and "Save" buttons.

Level 1 - Easy (E) Inverted pyramid — Loops
Write a program to print inverted pyramid pattern.

Your Code

```
1 import java.util.*;  
2  
3 class main {  
4     public static void main(String[] args) {  
5         Scanner s = new Scanner(System.in);  
6         int n = s.nextInt();  
7         int i = 0, j = 0;  
8         for (i = n; i > 0; i--) {  
9             for (j = (n - i); j > 0; j--) {  
10                 System.out.print(" ");  
11             }  
12             for (j = (2 * i - 1); j > 0; j--) {  
13                 System.out.print("*");  
14             }  
15             System.out.println("");  
16         }  
17     }  
18 }
```

Level 1 — Easy (E) Special Char — Strings

Write a program to print the special characters separately and print number of Special characters in the line?

Your Code

```
import java.util.*;
class string{
    public static void main(String[] args){
        Scanner s=new Scanner(System.in);
        String str=s.nextLine();
        int n=str.length();
        int c=0;
        for(int i=0;i<n;i++){
            char a=str.charAt(i);
            if (Character.isLetterOrDigit(a) && ! Character.
                int sum=1;
            }
            else{
                System.out.println(a);
                c+=1;
            }
        }
        System.out.println(c);
    }
}
```
