

CSA0904 – PROGRAMMING FOR JAVA

NAME: DHARSHAN A N

REG NO: 192525370

C02 – AT2

1.EMPLOYEE ID NOMINATION SYSTEM

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS Engineering logo, the lab name, and the user's name and registration number. The main content area displays a question titled "Employee ID Normalization System" with a description of the problem and requirements. The user's code is shown in a text area, and the output is displayed in a box. The interface also includes a sidebar with a list of questions and a bottom status bar.

QUESTIONS

- Q1 Employee ID Normalization System 10 marks
- Q2 University Course Enrollment Manager 10 marks
- Q3 Railway Parcel Dispatch Tracking System 10 marks

3/3 answered

Q1 Employee ID Normalization System 10 marks

An HR department receives employee IDs in mixed formats such as emp1023. Create a Java program to:

- Remove spaces using trim()
- Convert the alphabetic prefix to uppercase using toUpperCase()
- Join the prefix and number using concat()

Your Code

```
1 import java.util.Scanner;
2 class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         String emp = sc.nextLine();
6         emp = emp.trim();
7         String p = emp.substring(0, 3).toUpperCase();
8         String num = emp.substring(3);
9         String r = p.concat(num);
10        System.out.println("Formatted Employee ID: " + r);
11        sc.close();
12    }
13 }
```

Input

Dharshan

Output

Formatted Employee ID: DHARSHAN

Run Save

2. UNIVERSITY COURSE ENROLLMENT

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS Engineering logo, the lab name, and the user's name and registration number. The main content area displays a question titled "University Course Enrollment" with a description of the problem and requirements. The user's code is shown in a text area, and the output is displayed in a box. The interface also includes a sidebar with a list of questions and a bottom status bar.

QUESTIONS

- Q1 Employee ID Normalization System 10 marks
- Q2 University Course Enrollment Manager 10 marks
- Q3 Railway Parcel Dispatch Tracking System 10 marks

3/3 answered

Q2 University Course Enrollment Manager 10 marks

A university maintains a list of Students enrolled in a course. Students who withdraw must be removed from the list.

Requirements:

- Add student names to an ArrayList
- Traverse the list using an Iterator
- Remove withdrawn students and display the updated enrollment list

Your Code

```
1 import java.util.*;
2 class Main {
3     public static void main(String[] args) {
4         ArrayList<String> students = new ArrayList<>();
5         students.add("John");
6         students.add("Ram");
7         students.add("Priya");
8         students.add("Anu");
9         System.out.println("Updated Student List:");
10        Iterator<String> it = students.iterator();
11        while (it.hasNext()) {
12            String name = it.next();
13            if (!name.equals("Ram"))
14                System.out.println(name);
15        }
16    }
17 }
```

Input

stdin input

Output

Updated Student List:
John
Priya
Anu

Run Save

3.RAILWAY PARCEL DISPATCH

Q2

University Course Enrollment Manager

10 marks

Q3

Railway Parcel Dispatch Tracking System

10 marks

3/3 answered

Requirements:

Store parcel IDs in a Stack
Store parcel ID and destination in a HashMap
Unload parcels using pop() and display the destination of the unloaded parcel

Your Code

```
1 import java.util.*;
2 class Main {
3     public static void main(String[] args) {
4         Stack<String> p = new Stack<>();
5         HashMap<String, String> map = new HashMap<>();
6         p.push("P101");
7         p.push("P102");
8         p.push("P103");
9         map.put("P101", "Chennai");
10        map.put("P102", "Madurai");
11        map.put("P103", "Coimbatore");
12        System.out.println("Loaded Parcels: " + p);
13        String id = p.pop();
14        System.out.println("Unloaded Parcel: " + id);
15        System.out.println("Destination: " + map.get(id));
16        System.out.println("Remaining Parcels: " + p);
17    }
18 }
```

Input

stdin input

Output

Loaded Parcels: [P101, P102, P103]
Unloaded Parcel: P103
Destination: Coimbatore
Remaining Parcels: [P101, P102]
